

FTECH WORKWEAR

“TEXTILES THAT WORK AS HARD AS YOU”

FTECH
WORKWEAR

FTECH workwear

- Approximately 25 % more units per wash to launder and 50% less drying time.
- Slower flammability time than regular cotton.
- Easy care and anti-shrink.
- Engineered to keep the wearer dry, cool and comfortable while working.
- Stronger than regular cotton.
- Excellent colour fastness.

A new innovation in PPE

COOLER | LIGHTER | STRONGER

Functional structure of FTECH

MOISTURE WICKING FUNCTION OF FTECH

The double-layer structure of FTECH fabric quickly absorbs sweat on the skin side, moves the sweat to the surface, and diffuses and evaporates keeping the wearer dry and comfortable.

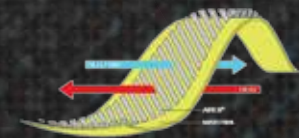

EASY-CARE

Keeps a good silhouette even after laundering. Readily home-laundered and able to wear as it is.

FTECH workwear’s main function is moisture wicking, keeping the body dry which allows the body’s natural cooling system of sweating to occur without PPE sticking to the body and blocking this function. This has a major benefit to help reduce heat fatigue.

3M OPTIONS

Fully taped in factory or 3M heat set tape locally

TESTIMONIAL

“On days I was not wearing FTECH, I worked half as hard and sweated twice as much.”

Richard Woodgate (Brunel)
